LAB³

TURN YOUR AI BUSINESS CASES INTO BUSINESS ACCELERATORS

Empower your people with AI solutions built on your own private Azure OpenAI instance

Enhance your organisation's performance and productivity with sophisticated, multi-agent AIs that fully leverage your Azure and OpenAI investment.

We'll give you everything you need to roll out solutions that address complex use cases using efficient AI problem-solving and automation.

We'll even get you started by working with you to deploy your first solution using your new tool set.

Empower your teams, streamline workflows, and deliver unparalleled user experiences that set you apart from the competition.

Leverage customised AI solutions for

- Complex RFQ Generation
- Operation Manual Production
- Design Document Generation
- Sales and Marketing Content
- And more...

TOOLING
- Azure readiness
- AI Studio setup
- Access PTU

TEMPLATES
- Content generators
- Q&A bots
- Subject matter experts

DEPLOYMENT
- 4-week innovation sprint
- MVP build
- Stakeholder demonstrations

RECENT AZURE OPENAI SOLUTIONS

USE CASE #1
SUBJECT MATTER EXPERT
(CONSTRUCTION)

BUSINESS GOAL
Meeting sustainability requirements without slowing project rollouts

SOLUTION
GPT that automatically identifies optimal materials based on quality, cost and sustainability metrics

OUTCOME
- More efficient project rollouts
- Lower project costs
- Faster sustainability reporting

USE CASE #2
TENDER RESPONSE GENERATOR
(LEGAL)

BUSINESS GOAL
Produce RFT/RFQ responses faster, with higher close rate and less effort

SOLUTION
Multi-agent GPT that assembles responses, cites internal data sources, and co-ordinates revisions

OUTCOME
- Reduced time and effort
- Higher technical detail
- Increase in won tenders

USE CASE #3
CUSTOMER SERVICE BOT
(FINANCE)

BUSINESS GOAL
Improve sales prospect and customer response time, without increasing headcount

SOLUTION
Web-based AI that answers customer questions, logs requests, and tracks incidents for resolution

OUTCOME
- Increased sales velocity
- Reduction of inbound support calls
- Better data for product dev

THE LAB³ AI AUTOMATION ADVANTAGE

Complex problem solving with RAG & LangChain

Repeatable, code–based deployments

ERP, CRM and Database integration

What will YOU do with advanced AI?

Let's get started today:
